

SPECIFIC PROBLEMS OF CHILDREN SUFFERING FROM THE EFFECTS OF PARENTAL ALIENATION

The following is a series of symptoms found in children affected by Parental Alienation. The effects can be both short and long term. Moreover, not all symptoms occur in all children. It should also be noted that there will be differences between younger and older children.

Anger

Loss or a lack of impulse control in conduct
Loss of self-confidence and self-esteem
Clinging and separation anxiety

Developing fears and phobias
Depression and suicidal ideation
Sleep disorders

Eating disorders
Educational problems

Bed wetting and soiling

Drug abuse and self-destructive behavior
Obsessive-compulsive behavior

Anxiety and panic attacks

Damaged sexual identity problems

Poor peer relationships

Excessive feelings of guilt
